Volume 228 July 1991

CONTENTS

Frontogenesis driven by horizontally quadratic distributions of density. David Jacqmin *page* 1

The velocity and vorticity vector fields of a turbulent boundary layer. Part 1. Simultaneous measurement by hot-wire anemometry. Petar Vukoslavčević, James M. Wallace and Jean-Louis Balint 25

The velocity and vorticity vector fields of a turbulent boundary layer. Part 2. Statistical properties. Jean-Louis Balint, James M. Wallace and Petar Vukoslavčević 53

Resistance of a grooved surface to parallel flow and cross-flow. Paolo Luchini, Fernando Manzo and Amilcare Pozzi 87

Three-dimensional wavelike equilibrium states in plane Poiseuille flow. U. Ehrenstein and W. Koch 111

On the stability of vertical double-diffusive interfaces. Part 1. A single plane interface. I. A. Eltayeb and D. E. Loper 149

On turbulent spots in plane Poiseuille flow. Dan S. Henningson and John Kim 183

On the dynamics of suspended microstructure in unsteady, spatially inhomogeneous, two-dimensional fluid flows. Andrew J. Szeri, Stephen Wiggins and L. Gary Leal 207

Normal shock-wave structure in two-phase vapour–droplet flows. J. B. Young and A. Guha 243

Shear flow of periodic arrays of particle clusters: a boundary-element method. N. Phan-Thien, T. Tran-Cong and A. L. Graham 275

The small-scale structure of acceleration correlations and its role in the statistical theory of turbulent dispersion. M. S. Borgas and B. L. Sawford 295

Energy spectra and coherent structures in forced two-dimensional and beta-plane turbulence. M. E. Maltrud and G. K. Vallis 321

Entrainment of an eddy at the edge of a jet. Melvin E. Stern 343

Convection in a rotating, horizontal cylinder with radial and normal gravity forces. Foluso Ladeinde and K. E. Torrance 361

Instability and transition in finite-amplitude Kelvin–Helmholtz and Holmboe waves. W. D. Smyth and W. R. Peltier 387

Numerical calculation of the underwater noise of rain. Hasan N. Oğuz and Andrea Prosperetti 417

On the stability of compressible flow past axisymmetric bodies. M. R. Malik and R. E. Spall 443

Self-excited compressible flow in a pipe–collar nozzle. W. C. Selerowicz, A. P. Szumowski and G. E. A. Meier 465

Influence of wrinkled premixed-flame dynamics on large-scale, low-intensity turbulent flow. R. C. Aldredge and F. A. Williams 487

Effects of rotation on convective turbulence. Harindra J. S. Fernando, Riu-Rong Chen and Don L. Boyer 513

Wind-augmented transport and dilution in shallow-water flows. Ronald Smith 549

Quenching processes and premixed turbulent combustion diagrams. T. Poinsot, D. Veynante and S. Candel 561

Vacillatory convection in a rotating spherical fluid shell at infinite Prandtl number. Keke Zhang 607

The effects of turbulent mixing on the correlation between two species and on concentration fluctuations in non-premixed reacting flows. Satoru Komori, J. C. R. Hunt, Takao Kanzaki and Y. Murakami 629

Splitting, merging and wavelength selection of vortices in curved and/or rotating channel flow due to Eckhaus instability. Y. Guo and W. H. Finlay 661

Reviews

Solar and Stellar Granulation, edited by R. J. Rutten and G. Severino 692

Physicochemical Hydrodynamics, by R. F. Probstein 692

An Introduction to Rheology, by H. A. Barnes, J. F. Hutton and K. Walters 694

Introduction to Polymer Dynamics, by P. G. de Gennes 695
